

目 录

| | |
|---|-------------------|
| • 激光 • | |
| 串接型三能级原子的感应极化..... | 朱诗尧等 (289) |
| XeCl B-X 跃迁自发辐射谱压力关系的理论计算 | S. B. Zhu 等 (295) |
| 分布反馈激光特性的实验研究..... | 王润文等 (302) |
| • 非线性光学 • | |
| 频率移动对受激散射相位共轭腔的稳定性与模式特性的影响..... | 刘劲松 (308) |
| 锁模激光相干激发原子的超窄共振效应..... | 何林生 (312) |
| • 光谱 • | |
| FeXVII 离子能级和振子强度的相对论多组态 Dirac-Fock 计算 | 赵永芳等 (319) |
| 用二极管激光探测法研究分子的动力学过程..... | 蔡继业等 (324) |
| • 集成光学 • | |
| 高灵敏度双折射光纤压力传感器..... | 谢海明 (332) |
| 棱镜-漏波导耦合器的理论分析 | 金 锋 (337) |
| • 薄膜光学 • | |
| 用准光波导方法测量聚合物薄膜光学参数..... | 任秉复等 (344) |
| • 全息术和信息处理 • | |
| 利用轮胎镜对 X 光波段的光成像 | 冯贤平等 (348) |
| • 光学仪器 • | |
| 高灵敏度的光声功率监测器..... | 吴际华等 (354) |
| • 激光材料 • | |
| 4T_2 和 2E 零声子线间隔与场强参数之间的关系..... | 李运奎 (359) |
| • 简讯 • | |
| 用 Kramers-Kronig 关系求出反射镜的相位色散..... | 梁培辉等 (363) |
| 存在外部光反馈的半导体激光器的相位噪声..... | 叶嘉雄 (368) |
| 光学 PAM-PDM 转换: 光学临界慢变效应的一种应用 | 钟立展等 (374) |
| 单模双包层光纤之间的耦合..... | 陈智浩等 (379) |

CONTENTS

Lasers

- Induced polarization of a cascade-type three-level atom.....*Zhu Shiyao et al.* (289)
- Theoretical calculation of pressure dependence of spontaneous emission spectrum from XeCl
B-X transition.....*S. B. Zhu et al.* (295)
- Experimental study on characteristics of distributed feedback laser.....*Wang Runwen et al.* (302)

Nonlinear Optics

- The effect of frequency shift on the stability and mode properties of stimulated scattering
phase-conjugate resonators*Liu Jinsong* (308)
- Supernarrow resonant effect of coherent excitation atoms using mode-locked laser
.....*He Linsheng* (312)

Spectroscopy

- Relativistic multiconfiguration Dirac-Fock calculation of energy levels and oscillator strengths
in a Fe XVII ion*Zhao Yongfang et al.* (319)
- Diode laser probing of dynamic processes of molecules*Cai Jiye et al.* (324)

Integrated Optics

- Birefringent fiberoptic pressure sensor with high sensitivity.....*Xie Haiming* (332)
- Theoretical analysis of the prism-leaky waveguide coupler.....*Jing Feng* (337)

Thin Film Optics

- Parameter measurement of polymer thin film with quasi-waveguide method.....
.....*Ren Bingfu et al.* (344)

Information Processing

- Imaging X-ray source by using toroidal mirror.....*Feng Xianping et al.* (348)

Optical Instrument

- Optoacoustic power monitor with high sensitivity*Wu Jihua et al.* (354)

Laser Material

- Relation among the interval of 4T_2 and 2E zero-phonon lines and crystalfield strength
parameter*Li Yunkui* (359)

Research Notes

- Application of Kramers-Kronig relations for calculating phase dispersion of reflective
mirrors*Liang Peihui et al.* (363)
- Phase noise of semiconductor laser due to external optical feedback.....*Ye Jiaorong* (368)
- Optical PAM-to-PDM conversion—An application of optical critical slowing-down effect
.....*Zhong Lichen et al.* (374)
- Coupling between two doubly cladding single mode fibers.....*Chen Zhihao et al.* (379)
