The third paragraph in Sec. IV REGENERATIVE AMPLIFICATION erroneously states “In other words, the distribution of spectral components is **time-dependent**, and the spectral distortion in the amplification process will not change the time-domain **shape**.”^{35,41} Instead it should state “In other words, the distribution of spectral components is **time-independent**, and the spectral distortion in the amplification process will not change the time-domain **shape**.”⁴¹

The authors apologize for the typos.
